Eclipse Modeling Framework (EMF) Tutorial

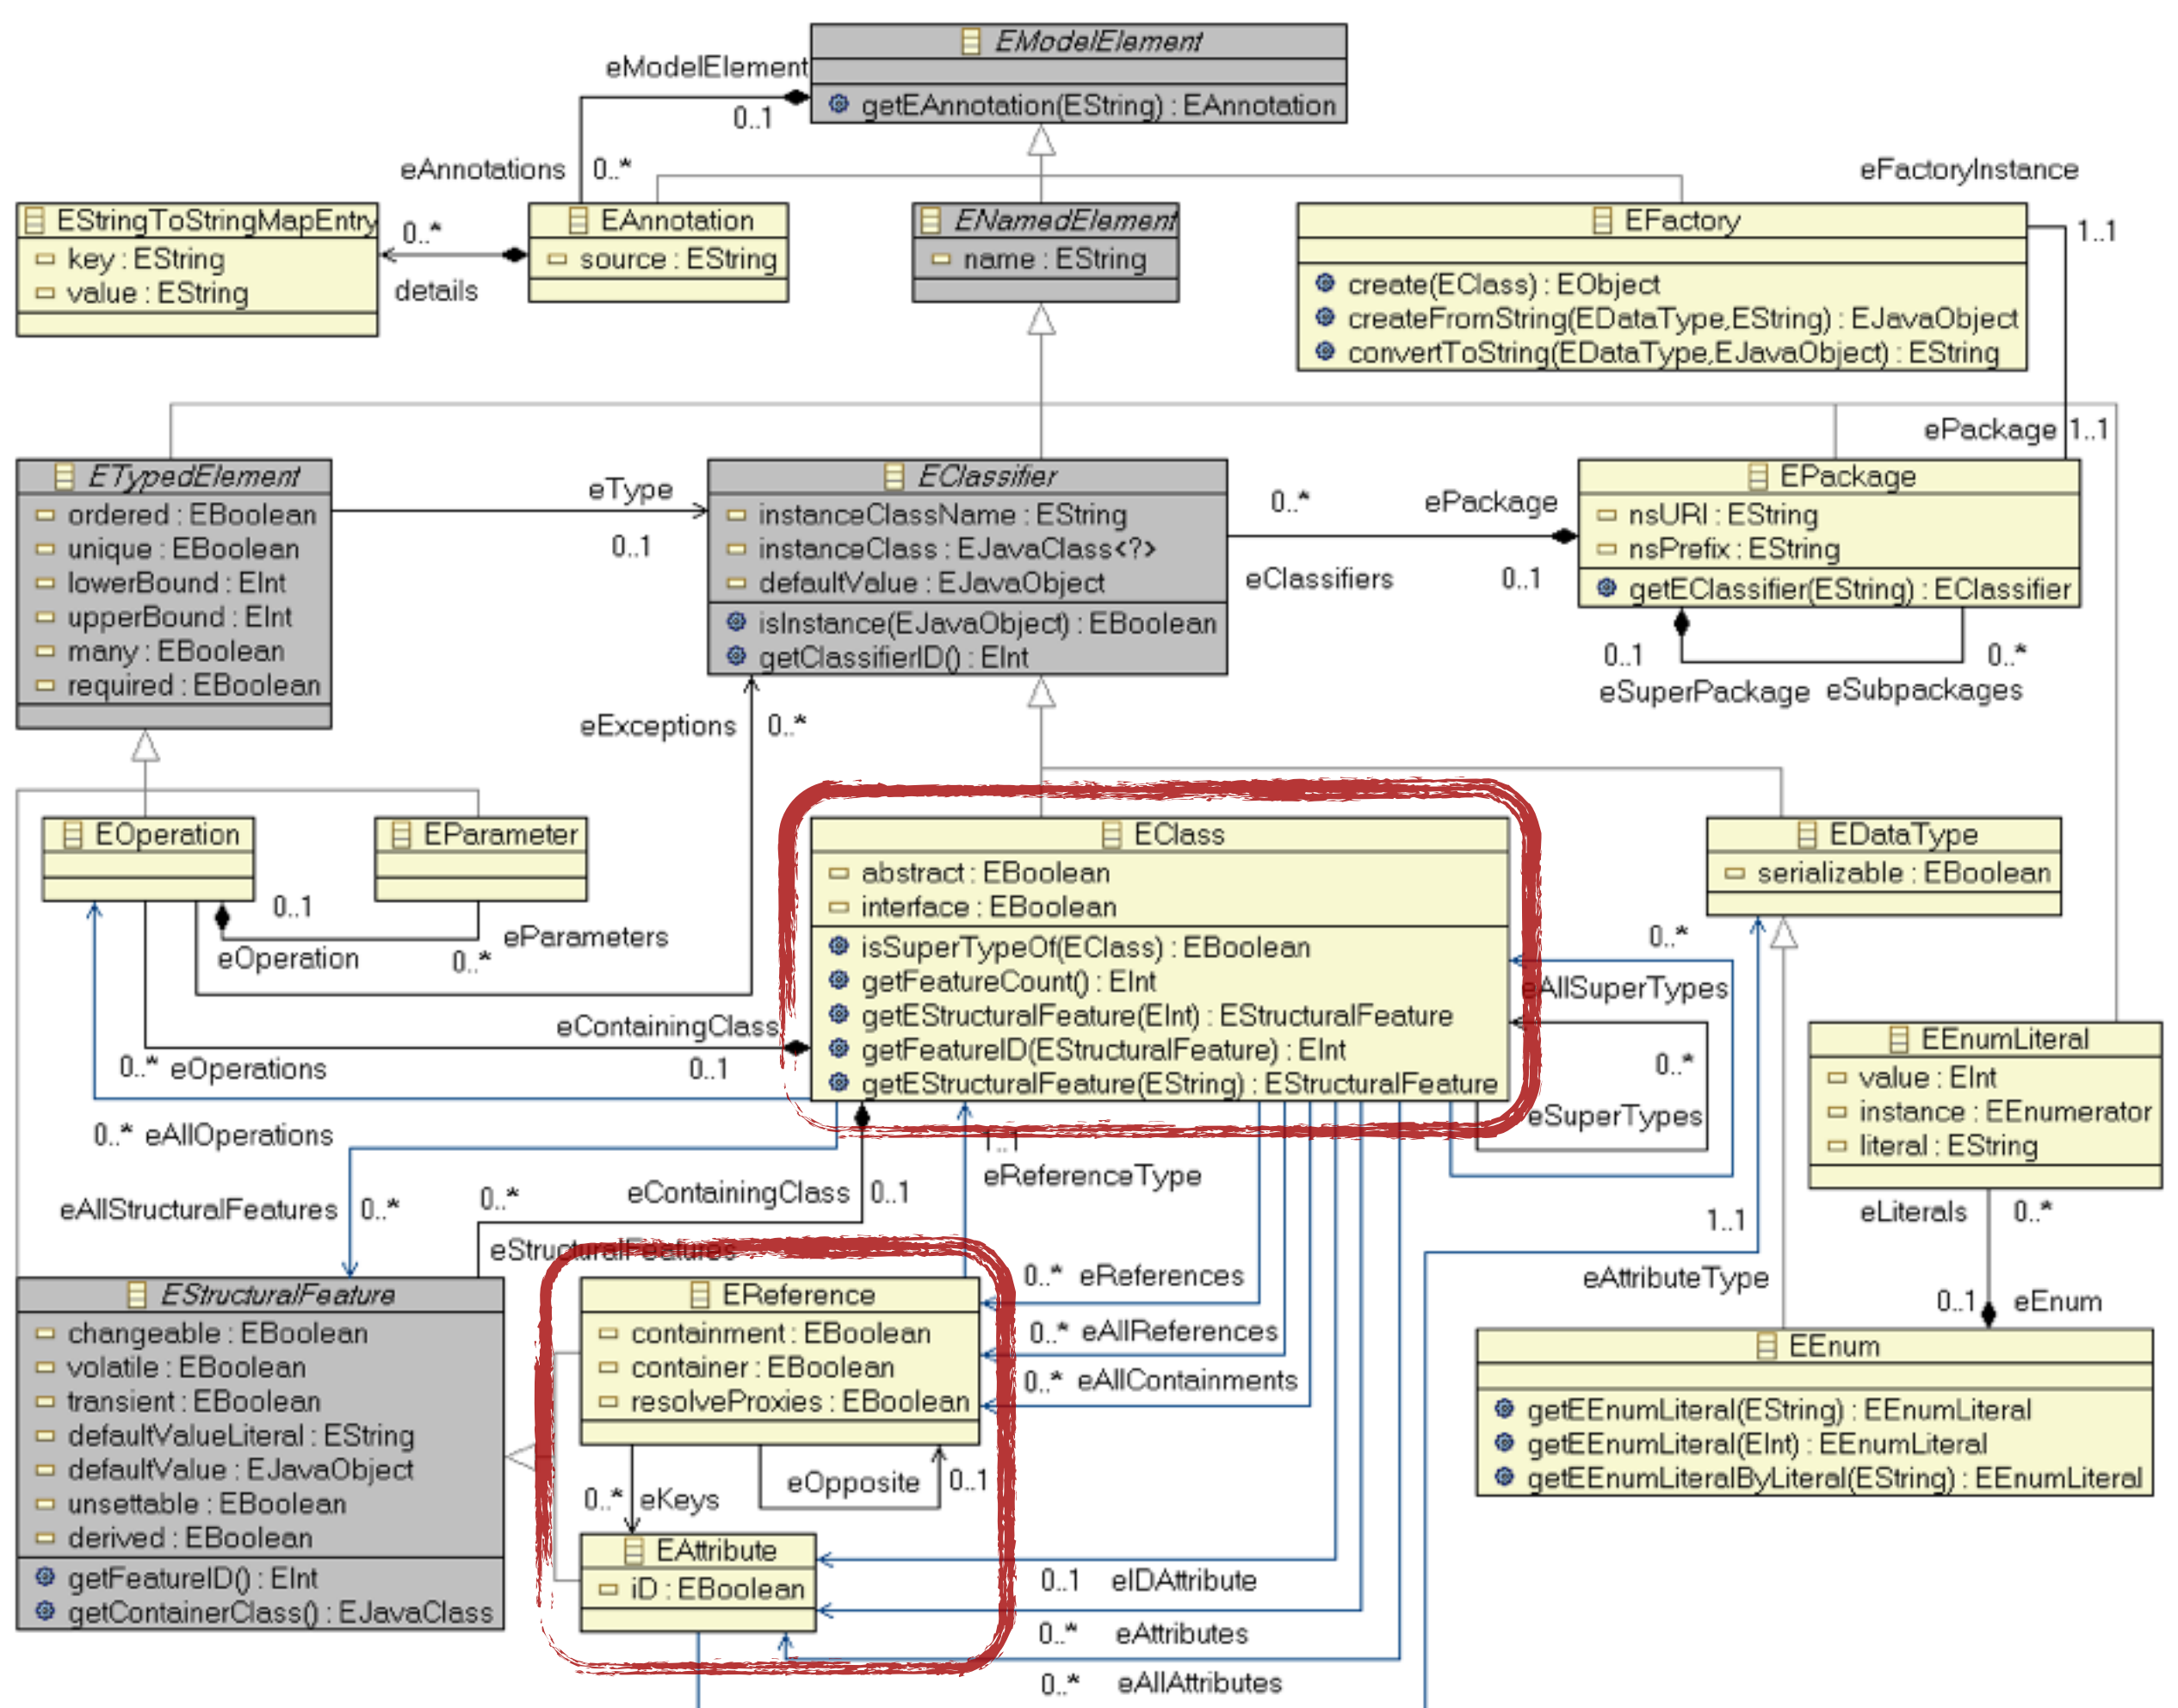

Matthias Schöttle

email: [mschoettle \(at\) cs.mcgill.ca](mailto:mschoettle@cs.mcgill.ca)

web: <http://mattsch.com>

“The EMF project is a modeling framework and code generation facility for building tools and other applications based on a structured data model. [...]”

–EMF Project Website, eclipse.org/emf

EMF: Brief Overview

Create structured data models (model-driven)
from scratch, XSD, Java, ...

Based on Ecore

Editing Support for your models

Interoperability with XML Metadata Interchange (XMI)

Generate high-quality code

Various tools build on EMF

EMF: Requirements

Download latest Eclipse Modeling Tools: www.eclipse.org

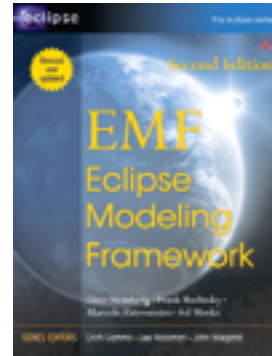

Done.

“What if I already have Eclipse (different package)?”

Install EMF —Eclipse Modeling Framework SDK, and...

EMF: Resources
